

Butterfly Valve

Product Brochure

Company Profile

Company Profile

DBV Valve Co., Ltd. was established in 2001 and is headquartered in Oubei, Yongjia, Zhejiang, the hometown of pumps and valves in China. It is a modern enterprise integrating the manufacture, sales and service of various intelligent control valves (pneumatic, electric and hydraulic control). We have a factory building area of more than 20,000 square meters, more than 200 sets of machine equipment and more than 300 employees.

The company has been awarded the titles of National High-Tech Enterprise, A-class Tax Credit Enterprise of Zhejiang Province, and Star Enterprise of Yongjia County, etc. It has also been certified by American Petroleum Institute (API), Customs Union TR Declaration (EAC), German Technical Supervision Association (TUV) and Det Norske Veritas (DNV).

The company mainly produces high pressure severe service products and metal to metal seat butterfly valves, metal to metal seat ball valves, low temperature valves, etc., which are manufactured strictly according to ISO, ANSI, API, GB, HG and other standards. We have advanced physical and chemical testing centre, professional CNC machining and test pressure automatic production equipment and experienced technical production team. Product pressure from 150LB-2500LB, 0.6 MPA-42.0MPA, temperature resistance -196°C - 800°C.

Choose Us For Quality

Relying on our strict quality management system, our products are widely used in petroleum, petrochemical, natural gas, coal chemical, metallurgy, electric power and other industries, and exported to Europe, America, Asia Pacific, the Middle East and other countries and regions, the company has been approved by Oman National Oil Company, Iran South Oil Company, Thailand National Power Plant, Russia National Oil Service and other large international terminal customers.

In terms of research and manufacturing, the company has a number of senior R & D teams, advanced manufacturing equipment, perfect physical and chemical testing and inspection methods (spectrometer, helium mass spectrometer, high and low temperature comprehensive performance test equipment, etc.), scientific information management system (integrated PDM, ERP, CAD, CAPP), comprehensive resources to provide customers with sustainable product solutions and collaborative service support.

As a fluid control solutions provider, the company is committed to innovation and service enhancement and is constantly striving to become one of the world's most professional, comprehensive and reliable valve manufacturers.

Customers & Partners

Customers & Partners

DBV Valve Co., Ltd. is a fluid control solution provider that has been developing and producing ball valves and butterfly valves in China for more than 20 years. Our sales and service network extends to dozens of overseas countries and regions, and our end products are used by companies such as Petronas, Anadarko, Petrobras, Lukoil.

The company has been approved as a qualified supplier by large international terminal customers such as Oman National Oil Company, Iran National South Oil Company, Thailand National Power Plant and Russia National Oil Company.

Honors & Qualifications

Honors And Qualifications

Qualification is the guarantee of an enterprise's products, and honour is the silent motivation of an enterprise.

In terms of product standards and quality, the company has obtained the "API6D, API609 Valve Production Design Standard Certification" issued by the American Petroleum Institute API, the "API6FA, API607 Valve Fire Test Certificate", the "SIL-3 Safety Equipment Integrity Level Certificate" issued by the German Technical Supervision Association TUV, the CE Certificate, the "ATEX Explosion Test Certificate" issued by the Norwegian Classification Society DNV and many other international certifications.

The company was awarded the title of national high-tech enterprise, the title of science and technology-based small and medium-sized enterprise in Zhejiang Province, the title of star enterprise in Yongjia County for three consecutive years, the excellent supplier of government procurement and many other honorary titles.

DBV valves are manufactured in accordance with the ISO 9001 quality management system and are subject to 48 production processes, comprehensive testing and inspection in accordance with international standards, thus guaranteeing the high quality of DBV valves.

Multi-Field Application Solutions

Multi-Field Application Solutions

Since its inception, DBV Valve has always been deeply involved in the valve field, with scientific and cutting-edge R&D and production processes, providing reliable, safe and economical fluid control solutions to customers worldwide in a variety of industries. With years of customization of fluid control solutions, DBV Valve has developed and produced a series of valves for various industries worldwide, including but not limited to: fine chemical industry, coal chemical industry, marine industry, new energy field, oil refining and petrochemical industry, metallurgical and mining industry, pharmaceutical and pesticide industry, nuclear power industry

三偏心蝶阀 Triple Eccentric Butterfly Valve

所谓三偏心是指在双偏心结构的基础上再增加一个角偏心，即使蝶阀的密封面呈倾斜锥形。这种结构的特点是将蝶板周边外侧加工成外斜锥面，将密封阀座内侧加工成内斜锥面。这时蝶阀的密封断面变成了椭圆形，蝶板密封面的形状也因此上下不对称。由于密封面为斜锥形，被阀杆轴分隔为偏大的一侧蝶板沿着大倾斜曲面向上方压向阀座，偏小的一侧蝶板沿着小倾斜曲面向下方压向阀座。蝶板密封圈与阀座间的密封不是靠阀座的弹性变形，而是完全依靠接触面的压紧实现密封，故三偏心蝶阀的开闭基本上无摩擦，并且随着关闭压力的增加，阀门越关越紧。从三偏心蝶阀的结构原理不难看出，三偏心蝶阀有以下优点：

- 1)密封性能好，提高了系统的可靠性；
- 2)摩擦阻力小，开闭省力、灵活；
- 3)使用寿命长，可以实现反复多次开关；
- 4)承压及耐高温能力强，适用范围广。

东宝三偏心蝶阀其适用范围已可以耐压高达 2500 磅级，耐温低至 -196 °C 高达 850°C，密封达到 0 泄漏，调控比高达 100:1 以上。

所采用的新技术、新工艺说明 Description of New Technology

Triple eccentric refers to an angle-added on the basis of the double eccentric structure, as the butterfly valve sealing surface shows an oblique cone. This structure is characterized by the outer side of the disc to be processed into an oblique cone, and also the inner side of the sealing seat is processed into an oblique cone. At this time, the section of the valve sealing surface becomes oval, thus the shape of the disc sealing surface is under the vertical asymmetry. Because the sealing surface is the oblique cone, the large part of the disc separated by the stem shaft presses the seat upwards along the large inclined surface, and the large part of the disc presses the seat downwards along the small inclined surface. The seal between the disc seal ring and the seat does not rely on the elastic deformation of the seat, but completely depends on the compact of the touching surface. So there is no friction in the process of the triple eccentric butterfly valve basically opening and closing, and the valve closes tightly with the closing pressure increasing. It is obvious from the principle and structure of the triple eccentric butterfly valve, the triple eccentric butterfly valve has the following advantages:

- 1)The sealing performance and reliability of the system are improved.
- 2)The friction is low, and the valve opening and closing flexibly.
- 3)The valve service life is longer and it could switch repeatedly.
- 4)The resistance of pressure and high temperature is improved, and the range of applications is wide.

The highest pressure of DBV triple eccentric butterfly valve could reach up to 2500 lb, and the temperature range is -196 up to 850. The sealing performance could be zero leakage and the regulation ratio up to 100:1.

产品的主要特点。 Main products' features

01

双流向均可承压，实现无流向限制的安装方式。

The pressure of bidirectional flow could be afforded to achieve no flow restrictions on the installation.

03

全金属密封设计，密封面采用司太立合金堆焊技术，解决了高温高压、低温等严苛工况下，蝶阀密封性能差的难题；

The design of fully metal to metal sealing, The sealing surface adopts the technology of overlaying stellite alloy, which solves the problem of poor butterfly valve sealing performance under the harsh conditions of high pressure, high temperature and low temperature effectively.

05

全新的三偏心结构设计，实现0摩擦，性能更加稳定，密封使用寿命延长。通过优化设计，确保蝶阀从低温到高温的灵活启闭，完全符合严苛工况下阀门零泄漏的密封标准。

The new design of triple eccentric makes the valve zero friction, more stable performance and longer service life. The compact design ensures that the butterfly valve flexible opening and closing from low temperature to high temperature, and excellent sealing performance, in full compliance with the sealing standard of zero leakage of valve in severe working conditions.

02

可更换的阀座和密封环设计，不会因为密封磨损问题而导致整机报废，降低使用成本；

The design of renewable seat and seal ring could avoid the valve damage caused by the wear of seal ring and reduce the cost of use.

04

东宝全金属密封结构蝶阀与多层密封蝶阀的区别在于，常规多层次金属密封结构为金属片与石墨层叠安装，多层次密封面易受流体冲蚀，使用寿命短。而东宝蝶阀密封副则采用全金属锻造而成的密封环，并在密封表面喷焊司太立合金，其优点为抗冲刷、寿命长、耐磨损，可应用于各类高温高压恶劣工况。

DBV fully metal to metal sealing structure is different from multilayer sealing butterfly valve. Common multilayer metal sealing structure consists of the metal sheet and graphite laminated in stallation, and multilayer sealing surface is susceptible to fluid erosion leading to short service life. However, DBV butterfly valve adopts all metal forged seal ring, and overlays stellite alloy on the sealing surface. Its advantages are anti-wear, anti-erosion and long service life, etc. DBV butterfly valve is suitable for many poor working conditions such as high pressure and high temperature.

执行标准 Executive standard

设计按 JB/T8527 的规定

法兰按 GB/T9113.1

结构长度按 GB/T12221的规定

压力试验按 GB/T13927、JB/T9092的规定

设计按 ANSI B16.34的规定

法兰按 ANSI B16.5或MSS SP-44的规定

结构长度按 API609的规定

压力试验按 API598的规定

(如需其他标准可另技术确认)

Design standard according to JB/T8527

Flange dimension according to GB/T9113.1

Face to Face according to GB/T 12221

Pressure Test according to GB/T13927,JB/T9092

Design standard according to ANSI B16.34

Flange dimension according to ANSI B16.5 or MSS-SP-44

Face to Face according to API609

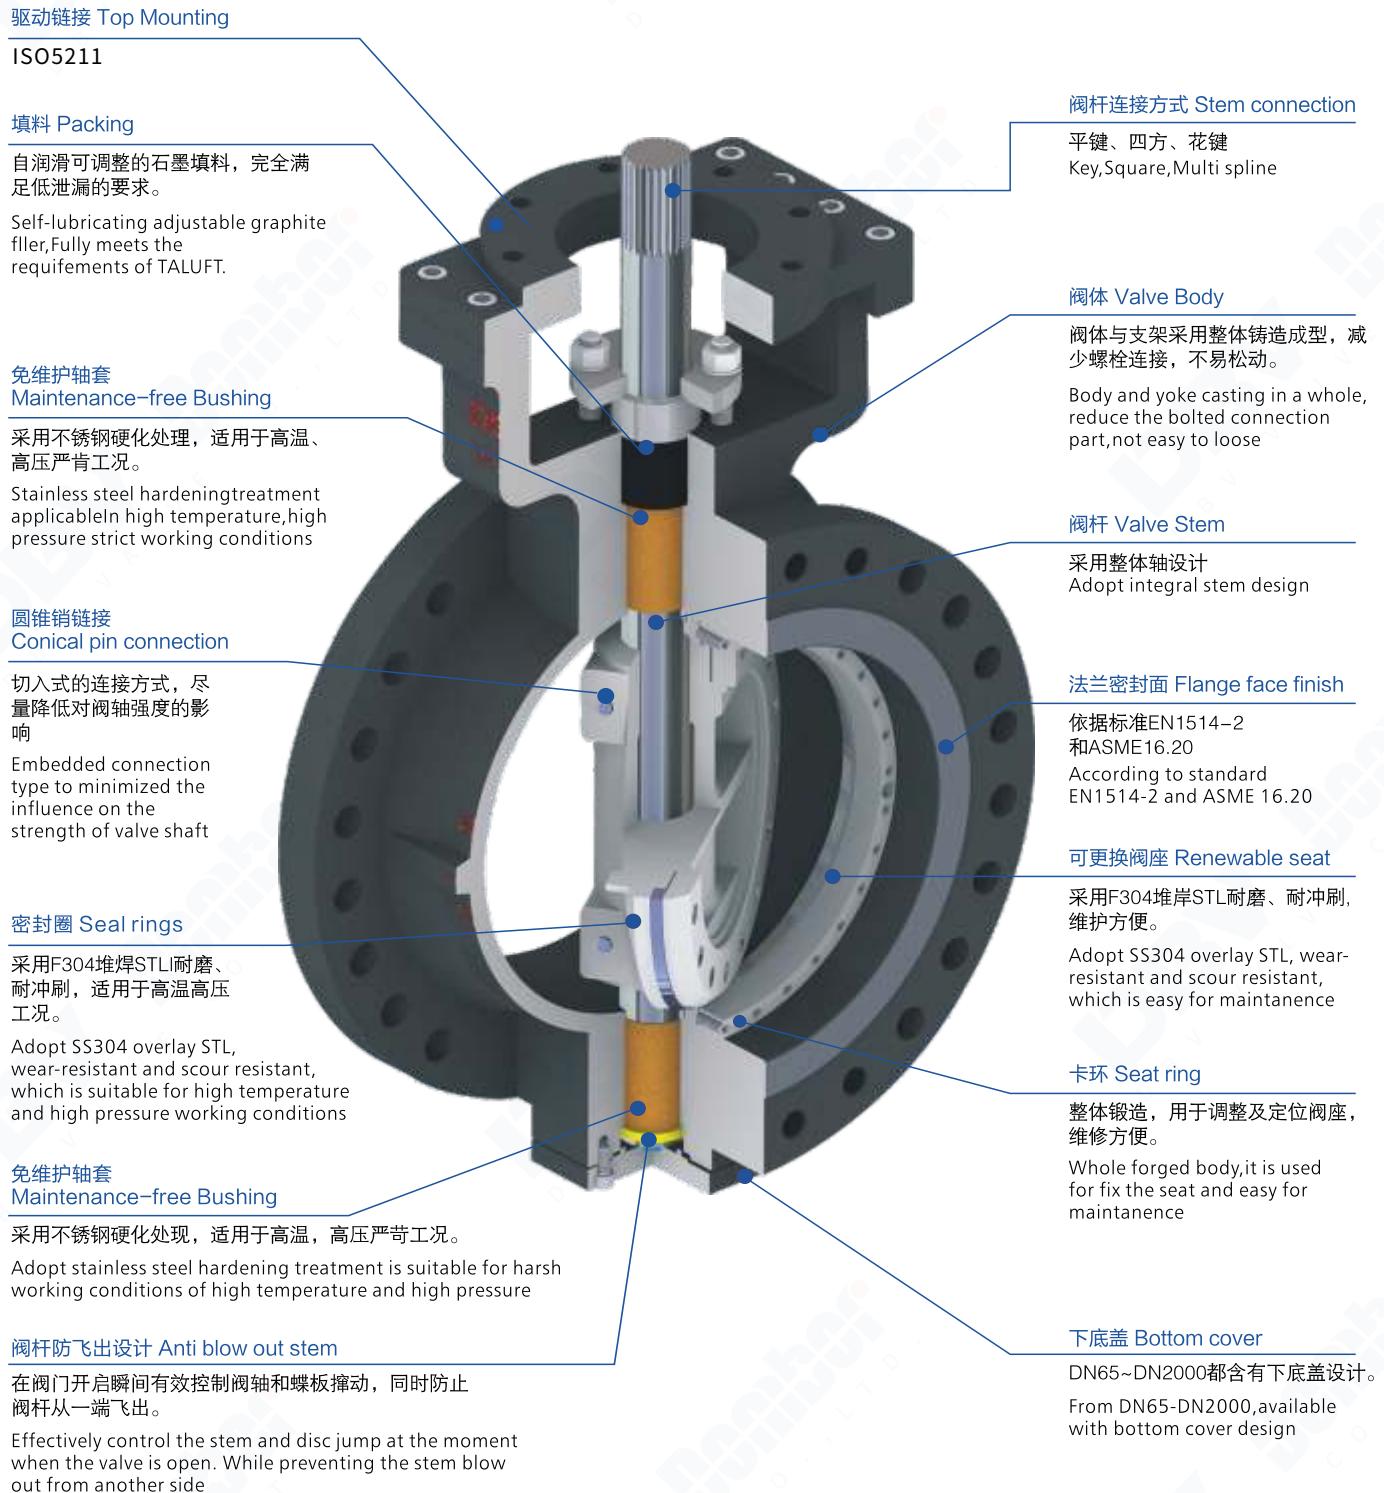

Pressure Test according to API 598

(other standard options according to technical confirmation)
